DETAILED ACTION

This office action is in response to the RCE with amendment filed May 30, 2006, after the withdrawal of an appeal to the Board of Patents Appeals and Interferences. In accordance with the amendment, claims 1-12 and 29 have been canceled, while claims 25, 26, and 30 have been amended. Claims 13-28, 30, and 31 are pending (it is noted that claims 32 and 33 had previously been canceled).

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on May 30, 2006 has been entered.

Information Disclosure Statement

2. The prior art documents submitted by Applicant in the Information Disclosure Statements filed on May 30, 2006, have been considered and made of record (note attached copy of forms PTO-1449).

Allowable Subject Matter

3. Claims 13-28, 30, and 31 are allowed. The following is an examiner's statement of reasons for allowance: the relevant prior art of record does not teach or reasonably suggest the *specific method limitations* of claims 13-24 (claim 13 independent) for fabricating an optical interconnect device, in particular see Appellant's Brief filed April 19, 2004 (page 11, line 15

Art Unit: 2874

through page 12, line 16). These arguments are persuasive, and these rejections were not upon appeal, since previously indicated as being allowable over the prior art of record. Regarding claims 25-28, 30, and 31 (claim 25 independent), the relevant prior art of record does not teach or reasonably suggest the specific limitations in which both the 1st and 2nd substrates are divisible into at least two portions in which the divisible structure is formed in the combination as claimed. Applicant's arguments in the paper filed May 30, 2006 (in particular see page 6, lines 16-28) are persuasive. The closest prior art of record (O'Connor et al. '704) does not teach or reasonably suggest either independent claims 13 or 25 (or their subsequent dependent claim limitations).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments, see RCE with amendment, filed May 30, 2006, with respect to the rejections to claims 13-28, 30, and 31 have been fully considered and are persuasive. The rejections of claims 25-28, 30, and 31 have been withdrawn (claims 13-24 had previously been indicated as being allowable over the relevant prior art).

Inventorship

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any

Art Unit: 2874

evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
